

Dear Sir/ Madam:

Indiana's telephone privacy law should not be diminished. The federal government has done nothing to help its citizens in this matter. I have not received as many calls as I used to especially at dinner time a prime time for these crooks to call. If you support them i would place you in the same category. My time at dinner is now spent with my family instead of on the phone. The calls have been decreased significantly from 4 to five down to 1 or none.

Sincerely,

Lewis Domke, Jr.
